

Qstream Power Pack Services: Empowered for Success

Our most basic services package, Qstream's Power Pack Services lays the foundation for success at enterprises with the internal resources to successfully support and manage their Qstream implementation.

Setup Services

Qstream will set up your private co-branded site with company logo and unique URL.

Administrator Training

Power Pack includes two online education passes covering site administration, content planning, development and authoring, as well as how to build Qstreams and best practices for supporting participants and managers. The service also includes complimentary content review and feedback for your first Qstream.

Help Desk and End-User Support

Qstream Power Pack Services includes email-based participant and program support. Our responsive client services team has the expertise to quickly understand and resolve your issues.

24x7 Power Tools

Receive unlimited access to Qstream's best-practices library with helpful information on creating effective Qstreams, managing successful rollouts, methods for conducting post-Qstream reviews, frequently asked questions (FAQs) and product update communications.

Let's Get Started!
